

GOVDOCS *POSTER CHECK*

Your Labor Law Poster Arrived, But Was It Posted?

AH, PEACE OF MIND. Your company has a GovDocs Update Program, which ensures all your locations are compliant with the required labor law postings. Whenever a posting change occurs, GovDocs ships new posters to those applicable locations.

But, wait – what about that nagging question in the back of your mind: “I know the posters were delivered, but are they actually hanging on the wall?”

Poster Displayed? **Check!**

GovDocs introduces Poster Check, a product that bridges the gap between poster delivery and display. With a quick QR code scan – or online code entry – location managers automatically receive a verification message, AND you're notified when a new or updated poster is displayed.

Here's how it works:

Posters – including Federal-on-One, State-on-One, State and Federal Combined and single-laminate postings (like city and county) – ship with a removable, unique Poster Check code

Once received, the location manager displays the poster and:

- ▶ Scans the QR code with a mobile device
- ▶ Or, enters a short alphanumeric online code and location zip code

Then, two things happen:

- ▶ The location manager gets a “Congrats! Your poster is verified as displayed” confirmation and removes the Poster Check sheet
- ▶ You receive verification on the GovDocs Dashboard

MORE PEACE OF MIND WITH POSTER CHECK

Track Real-Time Status in Dashboard

The GovDocs Dashboard provides a comprehensive view of which locations received a poster AND whether they've scanned (or entered) the Poster Check code.

Enterprise-Wide Coverage

Easily track which locations are verified, as well as those that may need a reminder to display their posters.
