INTRANET POSTER PROGRAM

Do All Your Employees Have Access to Required Labor Law Postings?

Your employee base is growing. It's spilled out from corporate offices to branch locations, to those who telecommute or work remotely. With all these locations, labor law posters in breakrooms or shared spaces are no longer sufficient. How can you provide easy access to postings regardless of where your employees work?

Labor Law Postings on Your Intranet

Well, we at GovDocs asked these questions, too. The result? The GovDocs **Intranet Poster Program**, an online tool that delivers the most current labor law postings to employees through your company's intranet.

With the GovDocs Intranet Poster Program:

- ✓ Employees access the most current federal, state, county, city and Canadian province postings; languages include English and agency-translated Spanish (where applicable)
- ✓ GovDocs automatically adds or updates postings whenever changes occur
- ✓ A user-friendly interactive map features the states and/or provinces in your GovDocs Update Program

Easy to Use

The GovDocs **Intranet Poster Program** is easily accessible to all employees, especially those working outside your official locations.

- ✓ Click a state or province on the map. Or select a location from the drop-down menu
- ✓ From the *Labor Law Postings* drop-down menu, choose a file from the list
- ✓ View, download or print the PDF

Secure Setup

- ✓ You and your GovDocs Implementation Manager select the states and/or provinces to include in the program
- ✓ Your Implementation Manager or Account Manager sets up your Intranet Poster Program – hosted on our secure server – and generates a custom URL
- ✓ You then add the URL to your Intranet with a standard hyperlink
