

# GOVDOCS LABOR LAW POSTERS

GET THE MOST OUT OF YOUR COMPLIANCE PROGRAM

The GovDocs Labor Law Poster Program simplifies compliance to help multi-jurisdiction employers save time and increase efficiency so you can focus on other essential matters.

## Monthly Updates in Your Inbox

The GovDocs Employment Law and Compliance team continually researches federal, state and local legislative activity to identify required new and changing labor law posters. Then, we compile these updates in The Grid, a comprehensive report delivered to clients the last business day of each month.

## Automatic Shipments to Your Locations

Once posters are available, they're shipped to affected locations by the 10th business day of the following month (i.e., January poster updates ship by the 10th business day of February). Plus, to reduce lost or misplaced posters, each shipment features a branded label with your logo for easy identification.

## Peace of Mind Posters Are on the Wall

Put to rest the question of whether locations have displayed posters with GovDocs PosterCheck. Powered by QR code technology, it confirms new or updated posters are up in your locations while protecting your investment and maintaining compliance.

## Easy Poster Audits

Check a poster's status anytime. ComplianceCheck helps your locations determine whether they have the most current labor law posters. With a quick QR code scan – located in the poster's bottom margin – it's a fast, simple way to audit.

## Remote and Hybrid Workers Covered

For employees working outside the office, the GovDocs Intranet Poster Program, our digital labor law postings solution, helps you efficiently manage labor law postings for remote and hybrid workers.

## Real-Time Information on Your Poster Program

The GovDocs Postings Dashboard is your one-stop online resource to manage and monitor your Update Program, including shipments, updates, poster files and location lists.

## Corporate Sustainability Alignment

Go green with us – all GovDocs labor law posters are printed on a highly durable, 100% biodegradable material that immediately begins to break down in landfills.

## Additional Programs to Maintain Compliance

To fit the specific needs of your business, we also offer supplemental Update Programs, including Spanish, federal contractor, Right to Work/E-Verify and Canada.
